

Check for Multicollinearity

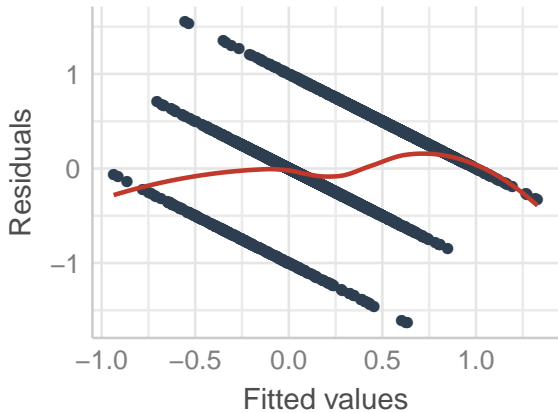

Non-normality of Residuals and C  
Dots should be plotted along the line

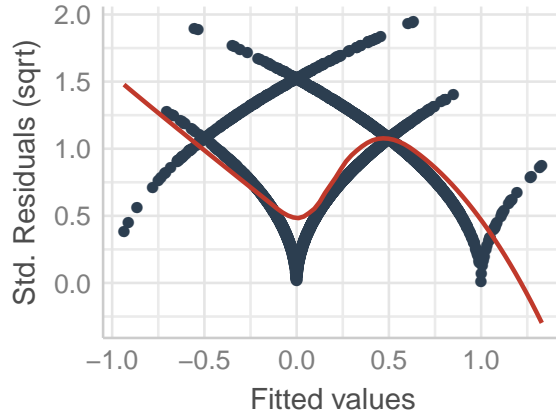

Non-Normality of Residuals  
Distribution should look like a normal curve

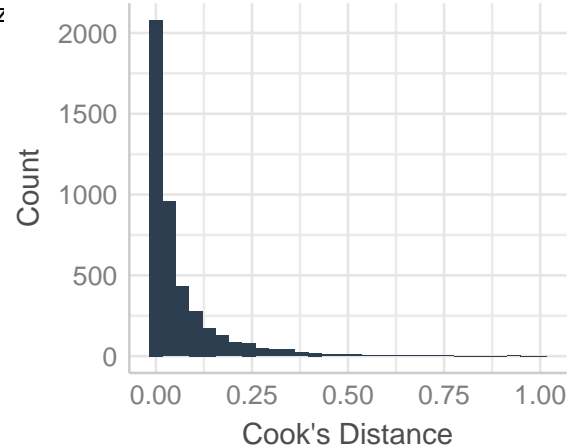

Homoscedasticity (Linear Relation)  
Dots should spread equally around horizontal line

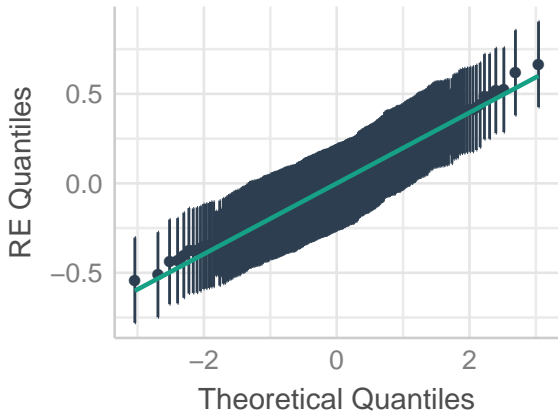

Homogeneity of Variance (Scale)  
Dots should spread equally around horizontal line

Check for Influential Observation

Normality of Random Effects (W)  
Dots should be plotted along the line

Normality of Random Effects (participant)  
Dots should be plotted along the line
